

TESTING EVENT 1

2012 Yearly Evaluation Subscription Instructions

Thank you for your participation in Maine Standards Company's Yearly Evaluation Subscription (YES) program. This Data Submission Packet contains information you will need to submit data for your **MSC4c** testing **EVENT 1**.

You can always depend on Maine Standards Company to make your calibration verification/AMR testing easier. Each VALIDATE® kit includes enough product for both YES testing events plus troubleshooting – so be sure to appropriately store all kits immediately following the completion of your **EVENT 1** testing.

Testing

Product to use: VALIDATE® UC5
Analytes to test: μ ALB/ALB and AMY/PAMY

Please remember, testing must be performed on or before **April 19, 2012**.

Return all kits to the appropriate storage conditions immediately following testing. These kits will be needed again for EVENT 2 testing in October, as well as for any troubleshooting purposes.

Submitting Data

In order for us to best serve your testing needs, we kindly request that all data be submitted on or before **May 3, 2012**. Timely submission of your data ensures that any possible testing issues or potentially inaccurate results will be quickly identified.

To be included in and receive Peer Group Analysis, you must complete the Peer Group Setup Packet. If you have not yet completed the Peer Group Setup Packet for testing **EVENT 1**, contact Customer Support at (800) 377-9684 before sending us your results.

For your convenience, we have enclosed a copy of the Data Submission Form for you to use when submitting your data. There is also an excel version of the form available for you to download on our website at www.mainestandards.com/Subscription. Forms can be returned via:

Email: datareduction@mainestandards.com

Fax: (207) 892-2266 attn: Data Reduction Department

US Mail: Maine Standards Company
Attn: Data Reduction Department
765 Roosevelt Trail
Windham, ME 04062

Thank you for choosing Maine Standards Company's YES program – the easiest way to validate your AMR.
